

**DRAFT #2**

**ACE Team Meeting  
Monday, October 13, 2008  
Southwest Research Institute  
San Antonio**

<b>830</b>	<b>Coffee</b>	
<b>900</b>	<b>Call to Order/Opening Remarks</b>	<b>Stone</b>
	<b>Local announcements</b>	<b>McComas</b>
	<b>Open items from the last ACE SWT</b>	<b>Mewaldt</b>
	<b>Remarks from Headquarters</b>	<b>Christian</b>
	<b>Flight Operations Report</b>	<b>Sodano</b>
	<b>ASC Report</b>	<b>Davis</b>
	<b>ACE Temperatures</b>	<b>von Rosenvinge</b>
	<b>New NOAA Plans for an ACE Follow-on</b>	<b>Mewaldt</b>
	<b>ACE News</b>	<b>Mewaldt</b>
<b>1020</b>	<b>Break</b>	
<b>1040</b>	<b>Education and Outreach Report</b>	<b>Barbier</b>
	<b>EPAM Status</b>	<b>Haggerty</b>
	<b>Upcoming meetings - workshops</b>	<b>All</b>
	<b>(Solar Cycle 24, STEREO SWGs, GLEs, SHINE, ICRC, others?)</b>	
	<b>Discussion: What about Future ACE Workshops?</b>	<b>All</b>
<b>1150</b>	<b>Lunch</b>	
<b>1300</b>	<b><u>Science Reports (~20 min each)</u></b>	
	<b>The weakening solar wind observed by ACE and Ulysses</b>	<b>McComas</b>
	<b>MAG Team progress on solar dynamics</b>	<b>Smith</b>
	<b>Backstreaming electrons associated with solar electron bursts</b>	<b>Skoug</b>
	<b>Suprathermal electron strahl widths</b>	<b>Skoug &amp; Anderson</b>
	<b>Comparisons of slow ICMEs at ACE and STEREO</b>	<b>Elliott et al.</b>
	<b>Perpendicular and parallel diffusion of solar energetic particles</b>	<b>Chollet</b>
<b>1500</b>	<b>Break</b>	
<b>1525</b>	<b>MAG Team progress on turbulence topics</b>	<b>Smith</b>
	<b>Multiple seed populations for ESP events</b>	<b>Desai</b>
	<b>MAG Team progress on shocks and shock acceleration</b>	<b>Smith</b>
	<b>Antiprotons and other secondary species in the radiation belts</b>	<b>Mewaldt &amp; Selesnick</b>
	<b>Room for more presentations</b>	

**Adjorn**

**DRAFT #2**

**ACE Team Meeting  
Tuesday, October 14, 2007  
Southwest Research Institute  
San Antonio**

- |             |                                                                             |                   |
|-------------|-----------------------------------------------------------------------------|-------------------|
| <b>845</b>  | <b>CIRs observed on ACE and STEREO</b>                                      | <b>Mason</b>      |
|             | <b>Are there high Q states at low energies in SEPs?</b>                     | <b>Moebius</b>    |
|             | <b>Inferred charge states at high energies in 3He-rich events</b>           | <b>Wiedenbeck</b> |
|             | <b>Solar Injection histories of near-relativistic solar electrons</b>       | <b>Haggerty</b>   |
| <b>1000</b> | <b>Break</b>                                                                |                   |
| <b>1020</b> | <b>ACE-STEREO onset timing in the Dec 13, 2006 SEP event</b>                | <b>Mewaldt</b>    |
|             | <b>Composition and spectral properties of quiet-time suprathermal ions</b>  | <b>Al-Dayeh</b>   |
|             | <b>Further evidence for cosmic ray origin in OB associations</b>            | <b>Binns</b>      |
|             | <b>from the TIGER experiment\</b>                                           |                   |
|             | <b>Are we there yet? Updated ACR and GCR intensities near solar minimum</b> | <b>Leske</b>      |
|             | <b>Schedule Next Meeting</b>                                                |                   |
|             | <b>Review of Action Items</b>                                               | <b>Mewaldt</b>    |
| <b>1200</b> | <b>Adjourn</b>                                                              |                   |
| <b>1315</b> | <b>SIS/CRIS Meeting (or after the afternoon coffee break)</b>               |                   |

Right now the agenda ends at noon. However, if more contributions and/or topics for discussion come up we could go as long as the afternoon coffee break.
